

SYN X

by  **Transpoco**

Road safety has to be the top priority for anyone in charge of a fleet, in order to protect staff as well as other road users. With SynX, we can really make the difference by creating a safer working environment and a more responsible generation of drivers.

SynX is a complete fleet management solution integrating driving style, fuel management and maintenance with all other aspects related to fleet operations. SynX provides global fleet data that helps decision making and increases fleet safety by monitoring driver behaviour, reinforcing risk assessment and promoting a safe driving culture within your business.

Driver behaviour

Get insights and alerts on driving style, monitor speeding, harsh braking, rapid acceleration and idling to train drivers and enhance safety.

Driver challenge

Set up games and competitions based on safety or consumption to create a safety culture in your fleet and prevent dangerous driving.

GPS tracking

Enjoy the benefits of tracking technology to get location data and crosscheck it with fuel, safety, maintenance information.

Fleet security

Make sure vehicles are used properly, prevent their theft and provide help to drivers in case of emergency

Fleet maintenance

Organise servicing and vehicle checks in an efficient way in order to always run roadworthy, safe vehicles.

Fuel management

Get complete visibility on fuel transactions, global consumption and take actions to boost fuel economy.

“Road safety is a top priority at Transpoco, with the number of customers and vehicles we work with we realise we have a real opportunity to save lives by positively impacting how vehicles are driven and maintained. At Transpoco we spend a large portion of our development time on making reports that clearly highlight risks for our customers and giving them tools to address and reduce these risks as quickly as possible.”

Andrew Fleury, CEO

How do you manage fleet safety in your business?

Maintaining the highest safety conditions while running a business that relies on driving isn't simply desirable: it has to be a priority!

SynX is a great tool for managing safety. You can keep tabs on driver behaviour, promote a safety culture within your fleet with driver challenges, use the data for managing risks or train drivers if dangerous driving behaviour tends to be recurrent issue.

Safety... and much more!

SynX helps you tackle your daily challenges:

Fuel

Lower fuel consumption, track fuel waste and reduce your carbon footprint.

Fleet costs

Cut on maintenance bills and global costs by streamlining fleet operations and increasing efficiency.

Location

Use GPS tracking to get vehicle information and fleet intelligence.

Insurance

Lower insurance premiums by preventing risks.

How does SynX help me in empowering fleet safety?

SynX is a complete system providing crucial safety insights and reports through different features:

- **Driver behaviour alerts and dashboard:** a complete system monitoring speeding, harsh braking, rapid acceleration and idling.
- **Map my issues:** review common dangerous driving patterns and where they occur.
- **Driver challenge section:** use games and competition to create a safety culture in your company and help to train drivers.
- **Complete maintenance section with walkaround checks:** keep vehicles roadworthy and safe to help you run a compliant fleet.
- **GPS tracking:** for vehicle and assets location and protection.

Regular maintenance for safety and compliance

With SynX you get vital help to schedule fleet maintenance, build a service provider database, run and record vehicle checks and walkaround checks.

By safely keeping track of servicing information you will guarantee compliance, prevent downtime and flag any issues as soon as they arise
